Turkmenistan	<b>0,7%</b>

**67,3% ARE  
FIRST-TIME VISITORS**

# PARTICIPANTS' FEEDBACK ON AQUATHERM TASHKENT:

**Jurat Salimjonov**  
Marketing Manager  
Dynamic System  
Distribution / Haier

This is our first time exhibiting at Aquatherm® Tashkent, and we have already made a strong impression by winning the Best Stand Design award. Haier places significant emphasis on heating, water supply and ventilation products, while Aquatherm is a recognised leading exhibition in these sectors. We have already established several valuable contacts with new clients from Uzbekistan and neighbouring countries. We are confident that we will return next year.

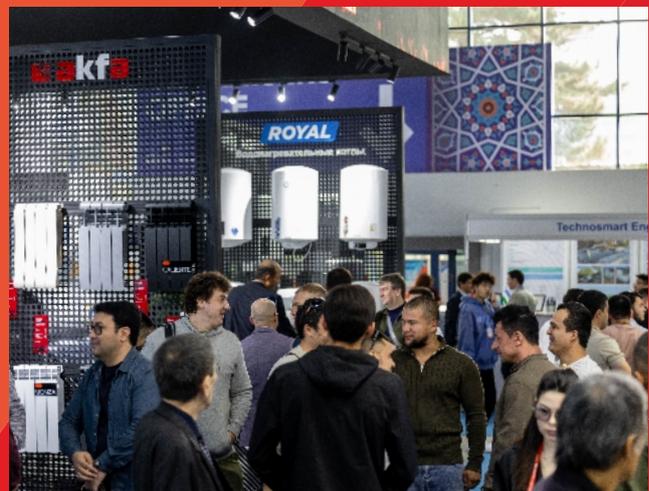

**Maksym Kuno**  
Regional Manager  
CA-W  
Kan Group

Kan Group, a Polish manufacturer of heating and water supply systems and materials, has long valued Aquatherm for its highly specialised audience. This year we were pleased to receive the award for Best Corporate Stand, as we expanded our stand significantly.

The exhibition brings exactly our target audience—construction companies, buyers, installation organisations and design firms, which creates important networking opportunities.

We were delighted to meet long-standing partners, establish new contacts and witness the hospitality and rapid development of the Uzbek market. We consider the exhibition a great success and expect to return next year for expanding and demonstrating our innovations.

**Miroslav  
Chuděj**  
Company Owner  
Chuděj

We are presenting our drainage systems, roof solutions, floor drains and pipe fixings. This is our second year at Aquatherm Tashkent.

Our stand has improved significantly this year and attracted many companies and clients interested in our products. Aquatherm is highly valuable to us: we welcomed visitors from Iran, Azerbaijan and Kyrgyzstan. We expect many new partnerships and orders and plan to participate again next year.

**Nicola  
Colato**  
Export Manager  
Lovato

Lovato, an Italian manufacturer of heating equipment including the Hercules distribution systems, is participating in Aquatherm Uzbekistan for the first time through our partner Climadens. Our product portfolio matches the needs of the Uzbek market, which has shown strong growth in recent years.

I was very impressed by the exhibition: the organisation was clear, the stand was well-positioned, and visitors showed genuine interest in our products.

The recognition of our partner — three Climadens awards — confirms the strength of our cooperation, and we are proud to support their work.

**Oleg Bondarenko**  
Export Area  
Sales Manager  
Ruck Ventilatoren

Ruck Ventilatoren, a German manufacturer of fans and ventilation equipment, is participating in Aquatherm Tashkent for the third time, by developing cooperation in Uzbekistan with local partners.

The exhibition demonstrates increasing interest in high-quality ventilation and climate control systems, and we look forward to new contracts.

Despite the strong demand, we see a need for more qualified specialists in system design and calculations, which opens further opportunities for market development.

**Vladimir Gladunets**  
General Director  
Koer

Koer, a major Ukrainian company and a leading player in the plumbing market, is entering the Uzbek market this year, starting with its participation in Aquatherm Tashkent.

We offer heating and water supply systems, pumping equipment, faucets and other product categories. The first two days of the exhibition were dynamic and well attended. The event was organised to a high standard, and we plan to participate again next year as we continue building our network in the region.
